Publishing and delivery	Syndication	Video SEO
Progressive download	Full mobile support & delivery	More...

Key Features and Applications

Kaltura's Enterprise Media Suite™ includes easy to use video applications all connected to Kaltura's core media platform. The platform also supports custom integrations using over 200 well documented APIs. Kaltura offers three deployment options: hosted by Kaltura, hosted on premise at the customer's data center or hosted on a virtual private cloud.

Core Platform (SaaS, On Prem, or on a Virtual Private Cloud)

Kaltura's core platform capabilities include media ingestion & transcoding, media and metadata management, publishing and delivery, live streaming, syndication, hosting and streaming, user roles and permissions, security, analytics, mobile delivery, captioning, video annotation, webcam recording, and video SEO. Content stored on the platform can be accessed via different applications used by the enterprise, based on permissions and configurations.

Kaltura Applications

Kaltura Management Console (KMC) - Media Management and Publishing Console

The KMC allows for full management, publishing and syndication of rich media collections. It can be used as an independent application and provisioned to different groups within the enterprise. It also operates as an administrative interface supporting other applications allowing administrators to adjust key settings across all Kaltura applications. The KMC allows you to perform bulk ingestion and upload, create transcoding profiles, add and manage metadata, design and configure players, create playlists, view analytics, configure live streaming, syndication, access control, and more.

**Kaltura MediaSpace™
(a YouTube™ or Media Portal for your enterprise)**

A fully customizable media portal that can be used both as an internal video collaboration portal, as well as an external video channel. Supports both employee and user submissions.

Kaltura Video Extension for SharePoint

A pre-integrated extension that seamlessly enhances Microsoft SharePoint's 2010 media capabilities and turns it into a flexible turnkey media solution for organizations.

CMS & LMS Integrations

Fully integrated media extensions for leading CMS and LMS platforms, allow for full media management capabilities within the secure authorization framework of the underlying CMS/LMS. Supported LMS platforms include Blackboard, Moodle and Sakai. Supported CMS platforms include WordPress, Drupal, Joomla and more.

Company Overview

New York-based Kaltura is the first and only provider of an open source video platform. With over 100,000 publishers using our award-winning platform, Kaltura is the fastest growing company in our industry, by far! Kaltura is pioneering the 'open video' revolution through initiatives like www.openvideoalliance.org, www.HTML5video.org and the introduction of collaborative video-making into Wikipedia.
